EDER ROSADAS DE OLIVEIRA BARRERA

Software Engineering Student (6th semester) · Web Developer

Bucaramanga, Colombia | ederrosadas1002@gmail.com | Portfolio: eder1002.github.io/My_Resume
LinkedIn: linkedin.com/in/eder-de-oliveira-587523360 | GitHub: github.com/EDER1002

PROFILE

Sixth-semester Software Engineering student at Universidad de Santander (UDES), focused on web development: building complete applications from the user interface to the server logic and the database. Member of the BIGATIC research group (semillero de investigación). Participant in several hackathons, solving real problems in teams under time pressure. Trained during vacations through Talento Tech (Colombian Ministry of ICT) bootcamps in Artificial Intelligence, Data Analysis and Programming. Organized, autonomous and results-oriented: I set clear priorities, review details before delivering and see through what I start. English B1 certified by Cambridge.

EDUCATION

B.Sc. Software Engineering: Ingeniería de Software — Universidad de Santander (UDES), Bucaramanga · In progress · 6th semester (2026)

High School Diploma: Bachiller Técnico Empresarial Bilingüe — Gimnasio Superior Empresarial Bilingüe, Bucaramanga · December 2023

PROJECTS

UDES FoodPass — Web app (in progress)
- Web app for university meal tickets and orders. Separate frontend and backend; availability, prices, reservations and ticket validation are enforced server-side.
- Keywords: Frontend + Backend, Server-side validation, Wompi / ePayco

YTM Ad Skipper — Firefox extension · Open source
- Firefox extension that skips YouTube Music ads, falling back to reloading or skipping the track. Open source with a step-by-step README.
- Keywords: JavaScript, WebExtensions API, MutationObserver, Firefox | github.com/EDER1002/ytm-ad-skipper

Trivia Colombia — Quiz web game · Team project
- Full-stack quiz web game about Colombia, built as a team project for the Full Stack Development course at UDES.
- Keywords: HTML, CSS, JavaScript, localStorage, Figma, Vercel | github.com/EDER1002/trivia-colombia | trivia-colombia.vercel.app

Tic-Tac-Toe (Triqui) — Browser game
- Browser game in HTML, CSS, JavaScript and Bootstrap with a 1 vs 1 mode and a vs-computer mode powered by the Minimax algorithm.
- Keywords: HTML, CSS, JavaScript, Bootstrap 5, Minimax | github.com/EDER1002/Triki

RESEARCH & HACKATHONS

BIGATIC Research Group — Member · Semillero de Investigación — UDES
- Applied technology research projects.

Hackathon Talento Tech Oriente — Participant · Bucaramanga · May 21–22, 2026

Seismic Risk Hackathon – Santander — Medium category
- Unsupervised machine-learning model (clustering) in Python using real data from the Colombian Geological Survey (SGC) seismic catalog, with 15+ variables including territorial features.
- Two-level pipeline: HDBSCAN discovers seismic sources from ~31,000 catalogued events, then K-Means groups Santander's 87 municipalities into 5 relative hazard levels. Results are served through a FastAPI REST API and an interactive map.
- Keywords: Python, pandas, scikit-learn, HDBSCAN, K-Means, GeoPandas, FastAPI | github.com/EDER1002/Modelo

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Bootstrap
Backend & languages: Java, Python, JavaScript
Databases: SQL, MySQL (relational), NoSQL (non-relational)
Data & AI: Python data libraries, Data analysis, Unsupervised ML (clustering), Algorithms: Minimax, greedy
Tools: Git, GitHub, Linux (Arch Linux)

CERTIFICATIONS

Programming – Intermediate Level (159 h) — Asociación Nacional para el Desarrollo Social – ANDES · July 21, 2026
Data Analysis – Basic Level (159 h) — Talento Tech – MinTIC / ANDES · February 25, 2026
Artificial Intelligence (159 h) — Talento Tech – MinTIC / ANDES · December 23, 2024
Cambridge English: Preliminary (PET) – CEFR B1, Grade B — Cambridge University Press & Assessment · June 3, 2023

LANGUAGES

Spanish: Native
English: B1 (CEFR) — Cambridge English: Preliminary (PET), Grade B, overall score 153 · June 2023

SOFT SKILLS

Organization · Attention to detail · Initiative · Results orientation · Teamwork · Problem solving · Working under pressure (hackathons)
